ABOUT US

Children in Afghanistan find a landmine near their village

The Marshall Legacy Institute (MLI) is a Virginia-based 501(c)3 nonprofit organization that was formed in 1997 to extend the vision of Nobel Peace Laureate George C. Marshall by alleviating suffering and promoting hope, growth, and stability in war-torn countries. For many nations, a primary obstacle to achieving sustainable progress is the deadly legacy of landmines, the relics of armed conflicts that often ended long ago. Landmines cause

long-lasting environmental degradation, halt agricultural production, impede economic growth, slow the return of refugees, instill fear, and kill and maim innocent people and animals on a daily basis.

MLI's primary mission is to establish practical, affordable, and sustainable indigenous programs to help severely mine-affected countries rid their land of the horrific scourge of landmines. This includes the development and implementation of the **Mine Detection Dog Partnership Program (MDDPP)**, which provides Mine Detection Dogs (MDDs) to accelerate the pace of landmine clearance operations; the **Survivors' Assistance** program, which helps those who have been injured by landmines; and the **Children Against Mines Program (CHAMPS)**, which promotes global citizenship and involves American youth in meaningful service-learning projects to help children living in war-torn countries.

These three programs: 1) educate citizens about the dangers of mines; 2) provide valuable resources, especially Mine Detection Dogs (MDDs), for landmine clearance; 3) train national leaders charged with mine action responsibilities; and 4) assist landmine survivors with physical and psychological needs. MLI provides resources and training to help countries build their own sustainable humanitarian demining programs.

Children living near a minefield

WHERE WE WORK

During the past 15 years, MLI has worked to assist severely mine-contaminated countries in helping themselves. By the end of 2012, we had provided 181 life-saving Mine Detection Dogs (MDDs) to 11 war-torn countries and trained and certified indigenous handlers to safely employ the dog teams in national landmine clearance programs. MLI also established CHAMPS and Survivors' Assistance programs in five countries. MLI's lifesaving dogs search millions of square meters of land each year so the land can be returned to safe and productive use. CHAMPS and Survivors' Assistance programs provided critically needed medical assistance, prosthetic limbs, and vocational training to hundreds of landmine survivors, and engaged tens of thousands of American youth in the global landmine issue.

2012 ACCOMPLISHMENTS

- MLI's 87 actively working dogs cleared 4,980,337 square meters, or 1,230 acres, of mine-affected land, despite tough weather conditions in certain regions.
- MLI's Children Against Mines Program (CHAMPS) programs linked American students with schoolchildren in Afghanistan, Iraq, and Yemen, provided mine risk education to vulnerable communities and helped dozens of children injured by landmines.
- The CHAMPS Team engaged more than 10,000 students, teachers and administrators at American schools and educational events to increase landmine awareness.
- MLI donated 7 life-saving mine detection dogs to Sri Lanka and 4 MDDs to Iraq.
- MLI provided dozens of prosthetic limbs, wheelchairs, and walking sticks to survivors in Afghanistan, Iraq and Yemen.
- MLI also provided vocational training in computers, small engine repair and sewing courses for hundreds of landmine survivors.
- Seventeen recently donated MDD teams in Angola, Iraq and Sri Lanka completed the intensive training course and were certified according to international standards so they could begin their life-saving work.
- MLI concluded a two year Iraqi physician training project that provided Iraqi physicians with specialized training in the treatment of traumatic injuries for mine survivors.
- MLI's innovative new program, the Partnership for Iraq (PFI) program established a vocational training and rehabilitation outreach facility in Basra, Iraq where hundreds of mine survivors are receiving medical care and vocational training.

MINE DETECTION DOG PARTNERSHIP PROGRAM

MLI's longest running project is the **Mine Detection Dog Partnership Program (MDDPP)**, which works to increase the quality and quantity of life-saving Mine Detection Dogs (MDDs) in countries that are severely affected by landmines. Remarkably, MDDs have proven to be one of the most valuable tools in mine detection, locating landmines 30 times more quickly than many other detection tools. As part of MLI's overall strategy to build indigenous capacity to remove landmines and establish sustainable demining programs, MLI donates MDDs to mine-contaminated countries and then provides training and support to the beneficiary demining organizations. Typically, the MDDs are sponsored by private donors and program support is generously provided by the U.S. State Department's Office of Weapons Removal and Abatement (PM/WRA).

In 2012, MLI donated 11 MDDs to two war-torn countries: Iraq and Sri Lanka. These dogs joined the prestigious ranks of the 87 currently active MDDs that MLI has donated to 11 mine-affected countries. **Last year, these dog teams searched 4,980,337 square meters, or 1,230 acres, of land in some of the most heavily mine-infested countries of the world, thereby making it safe for children to play and communities to grow.**

The growth of the mine dog program in Sri Lanka is an exciting development. Seven highly-trained MDDs were donated to the Sri Lankan Army's (SLA) Humanitarian Demining Unit to help the country recover from more than 30 years of conflict.

MLI also provided four MDDs to the Iraqi Mine and UXO Clearance Organization (IMCO) in Iraq. These dogs joined the ten other MDDs that MLI has given to Iraq since 2008/2009. The MDDs in Iraq searched **343,186 square meters of land** in 2012! MLI is planning to expand the MDDPP to provide additional dogs to Azerbaijan and Iraq in 2013.

MDD Legacy alerts to the scent of a buried landmine in Iraq

CHILDREN AGAINST MINES PROGRAM (CHAMPS)

Through the Children Against Mines Program (CHAMPS), MLI delivers landmine presentations and demonstrations to schoolchildren throughout the U.S., inspiring American children to not only explore the global landmine problem, but to also become part of the solution. CHAMPS elevates awareness about landmines, promotes global citizenship, and raises funds to sponsor life-saving MDDs and to help youth who have been wounded by landmines. CHAMPS youth have sponsored 27 Mine Detection Dogs (MDDs) and have helped hundreds of landmine survivors!

In 2012, MLI's CHAMPS team reached more than 10,000 students and linked American youth with students in Iraq in Yemen to help others.

Participating CHAMPS students directly helped 25 young landmine survivors, raising money to provide them with prosthetic limbs, and other critically needed medical care.

Survivors' Assistance Program

Unfortunately, there are hundreds of thousands of people who have been injured by landmines, and approximately 5,000 additional men, women, and children are hurt by these deadly weapons each year. Therefore, MLI's **Survivors' Assistance Program** began as a way to implement a variety of programs that assist those who have been injured by mines. MLI provides prosthetic devices, rehabilitative treatments, and vocational training to hundreds of landmine survivors each year and we are currently funding a program that provides specialized rehabilitative medical training to doctors in Iraq.

Al-Karkh Primary School (Top), CHAMPS CT students with MDD Senna and MLI President, Perry Baltimore (Middle), Family living near a minefield in Lebanon (Bottom)

AFGHANISTAN

Mine Detection Dog Partnership Program in Afghanistan

Hundreds of thousand of landmines remain hidden throughout Afghanistan and continue to endanger people's lives. Hundreds of people are injured or killed by mines each month, many of whom are children, but only one in four can afford to get the medical care they need.

Since 2007, MLI has donated **28 Mine Detection Dogs (MDDs)** to four Afghan demining organizations. In 2012, these dogs searched **2,129,151 square meters, or 526 acres**, of land which directly affected 6,750 people in the areas of Parwan, Kabul and Nangarhar provinces. This land can now be used for pasture, residential and grazing purposes.

MDD Country, sponsored by Glenelg Country School (Top), MDD Scooby, sponsored by Wyoming Association of Broadcasters (Middle) & MDD Stryker, sponsored by General Dynamics (Bottom)

AFGHANISTAN

CHAMPS and Survivors' Assistance

In 2012, two Afghan schools, Roshan High School in the Laghman Province and Aybak School in the Samangan Province of Afghanistan, communicated with multiple schools in the U.S. through video-conferences. The CHAMPS team also engaged over **8,000** Afghans in mine risk education where they learned about landmines and accident prevention. CHAMPS students in the U.S. also made it possible for **dozens of young survivors** to receive medical assistance and rehabilitative help, including Bass BeBe and Akhter shown in the photos on this page.

Bass BeBe lost her right leg and injured the other at the age of 8 when the car she was riding in drove over a landmine. Her other family members in the car were killed, and Bass BeBe sustained terrible injuries. She is very thankful to have received medical assistance from MLI and Help the Afghan Children (HTAC), which made it possible for her to receive a prosthetic leg and hope for the future.

*Landmine Survivor Akhter Mohammad (Top),
CHAMPS MRE Training (Middle), and Survivor
Bass BeBe (Bottom)*

ANGOLA

Mine Detection Dog Partnership Program in Angola

The landmine problem in Angola stems from more than twenty years of military conflict. Although the civil war ended in 2002, all 18 Provinces in Angola continue to suffer from landmine contamination. The "Landmine Monitor" estimates over 70,000 landmines survivors in Angola, with more added each year.

In October 2011, MLI began establishment of the first indigenous Mine Detection Dog program in sub-Saharan Africa by donating six MDDs to Angola's National Demining Institute (INAD), the indigenous organization most responsible for the vast majority of landmine clearance in Angola.

ANGOLA

After completing a rigorous training course in 2011-2012, the MDD teams passed the international mine standards certification test in May 2012 and began demining activities in Caxito, a province of Bengo. Their work is impacting the lives of more than 156,100 people who are living in this heavily mine-affected region, enabling the citizens to use their land safely again.

The work of INAD and its MDD teams is enabling refugees and IDPs to return to their land, and is providing secure access to water, clearing the way for the construction of a water treatment plant, and assisting in the reconstruction of Angola's railway system.

MDD Team Box training (Top) MDD Cindy, sponsored by Tony Lake and the Africa Delegation (Middle), and MDDs Cindy and Zafira in the field "sniffing out" landmines (Bottom)

AZERBAIJAN

Mine Detection Dog Partnership Program in Azerbaijan

Conflict with Armenia and the collapse of the Soviet Union left much of Azerbaijan littered with landmines that continue to endanger people's lives, threaten livestock, and prohibit the use of farm land for millions of people. To combat this threat, MLI has been working with ANAMA, the Azerbaijan National Agency for Mine Action, to clear the land of mines and other hidden explosives.

Since 2005, MLI has given **24 dogs** to Azerbaijan, and plans to donate an additional five MDDs in 2013. ANAMA uses the Mine Detection Dogs to survey suspected hazardous areas (SHAs) and provide quality assurance (QA) to areas checked by other demining tools.

AZERBAIJAN

Mine Detection Dogs have searched more than 17 million square meters, or 29,084 acres, of mine contaminated land in Azerbaijan! Although some of MLI's MDDs have retired from work or passed away from old age, the active MDDs *Akela*, *Alma*, *Beti*, *Brownie*, *Canto*, *Danik*, *Dexter*, *Donohue*, *Duco*, *Fowler*, *Gaga*, *Gavran*, *Guru*, *Lipscomb*, *Marcos*, *Mojca*, and *Tessa* were incredible assets during 2012, returning more than 1.8 million square meters - the equivalent of 460 acres - of land to the people of Azerbaijan.

The teams worked in the Agcabadi district, Terter, Goranboy and Fizuli district. Approximately 444,000 people live in this region and they had been unable to use the land for nearly two decades. With the help of MLI's Mine Detection Dogs, they can now safely access their land and use it to grow crops and graze their animals.

MDD Donahue (Top), MDD Dexter in the field (Middle) and MDD Mojka (Bottom)

Bosnia Herzegovina

Mine Detection Dog Partnership Program in Bosnia Herzegovina

Bosnia and Herzegovina has been contaminated by landmines since its civil war in 1992-1995, and is the most mine-affected country in Europe. These landmines deny people access to valuable resources, agricultural land, timber and endanger the lives of thousands of people.

With the help of MLI, **273,421 square meters**, or nearly **68 acres**, were searched in 2012.

MDD Charlie (Top), MDD Granite searching for landmines (Middle), President Perry, General Sullivan and the State Department at the MANMADE Dinner

Bosnia Herzegovina

MLI and the Mine Dog Detection Center (MDDC) hosted the first **Mine Awareness Night to Make a Difference (MANMADE) Dinner** in Sarajevo to raise money for landmine clearance, medical assistance for survivors, and mine risk education (MRE). Not only was the dinner a great opportunity to celebrate the progress that has been made in Bosnia, but with support from the American Chamber of Commerce, the US Embassy and local businesses, governments and individuals, the dinner raised **over \$100,000**.

This money was used to support the work of MDDs *Charlie* and *Granite*, who helped find 10 antipersonnel mines and 13 UXO in Olovo, a town in the northeast of Bosnia and Herzegovina. Approximately 7,000 people live in this area and are now able to use the land safely. Additionally, the funds from the MANMADE Dinner helped landmine survivors and supported mine risk education presentations for children living in threatened communities. Sixteen MRE presentations were given to schoolchildren throughout the country's most mine-affected areas, reaching 1,015 youth.

MDD Sully (Top) & MDD Betsy "sniffing out" landmines (Bottom)

IRAQ

Mine Detection Dog Partnership Program in Iraq

Landmines and unexploded ordnance (UXO) litter Iraq as a result of multiple conflicts over the past 30 years, affecting more than 1.6 million people and 1,730 square kilometers. With support from the U.S. Department of State and caring, private donors, MLI began the Mine Detection Dog Partnership Program (MDDPP) in Iraq in 2008 to employ MDD Teams in humanitarian mine clearance operations. MLI has since donated fourteen of these lifesaving dogs to the Iraqi Mine & UXO Clearance Organization (IMCO) and the Mines Advisory Group (MAG).

In 2012, MLI donated **4 new lifesaving dogs** to IMCO. With the help of the MDD teams, **343,186 square meters**, or nearly **85 acres**, of land were cleared last year and the population can now safely use this land.

IRAQ

CHAMPS and Survivors' Assistance Program in Iraq

In 2012, MLI linked schools in Baghdad and Basra with American schools in Philadelphia (PA), Ellicott City (MD) and Greenwich (CT) through monthly video-conference calls. Not only does CHAMPS allow American students to learn more about the life of Iraqi children, but the program also raises landmine awareness and encourages children to work together to help those others in need.

Through CHAMPS, MLI was able to donate wheelchairs to four survivors who are double amputees, and an electric wheelchair to a boy who lost both legs and an arm. CHAMPS students also raised funds to provide prosthetic limbs to twelve landmine survivors who are now be able to walk again.

CHAMPS MUNSA Team meet MDD Legacy (Top), Iraqi students in Qurna (Middle), and Students from Al-Karkh Primary School(Bottom)

IRAQ

Survivors' Assistance

Partnership For Iraq (PFI) Program

In Iraq, MLI recently launched a large scale program to assist the tens of thousands of mine survivors who are living in and around Basra in southern Iraq. Both young & adult landmine survivors in Basra face long-term medical and psychological challenges after their injuries have occurred. As young survivors grow, costly prostheses require replacement, repair and maintenance. Survivors often suffer psychological distress and require continued medical care & social integration.

With support from private Americans and the U.S. State Department, and in partnership with the Iraqi and UXO Clearance Organization (IMCO) and the Polus Center, MLI launched the Partnership for Iraq (PFI) in 2012. This PFI initiative is the first of its kind and is creating a comprehensive system to: 1) provide vocational training and medical assistance for survivors, 2) provide specialized training and equipment for local rehabilitation specialists to better treat mine survivors, and 3) identify and register mine survivors in the national database of persons with disabilities, so that their needs can be better assessed and met.

IRAQ

Survivors' Assistance

Partnership For Iraq (PFI) Program

Between October and December, the first 90 landmine survivors were identified to receive vocational training classes. Thirty young women were identified and the first 10 had already begun sewing classes, while an additional 60 young men would soon be trained skills such as carpentry and small engine repair. Upon completion of their training, the survivors will receive certificates of completion and assistance in finding meaningful employment.

Additionally, 70 survivors in need of mobility assistance were identified to be given prostheses and wheelchairs, including one electronic wheelchair for an individual who lost both of his legs and an arm in a landmine explosion.

LEBANON

Mine Detection Dog Partnership Program in Lebanon

Lebanon is contaminated with landmines and Unexploded Ordnance (UXO) as a result of a fifteen year-long civil war and ongoing conflicts with neighboring countries. While over 90 square kilometers of land are still contaminated, MLI is helping the Lebanese Mine Action Center (LMAC) free its land of mines and other explosive remnants of war.

Since 2001, MLI has donated 23 life-saving Mine Detection Dogs to “sniff out” landmines and save lives. In 2012, despite often difficult working conditions, the dog teams effectively and efficiently searched **169,950 square meters** of mine-contaminated land. They saved and improved countless lives by locating **48 mines** and **1 mortar**.

MDD Ando in the field (Top) & MDD Vilma (Middle) & MDD Fox (Bottom)

LEBANON

Survivors' Assistance Program in Lebanon

In the summer of 2012, MLI partnered with the American Task Force for Lebanon (ATFL), the Lebanon Mine Action Center, and the Landmine Resource Center at the University of Balamand to launch a comprehensive program to assist landmine survivors. With funding from the U.S. Department of State's Office of Weapons Removal and Abatement and generous ATFL private donors, this highly successful program provided critically needed medical care, prostheses, vision care, and vocational training to 90 landmine survivors from the Bekaa Valley, Mount Lebanon, and the South of Lebanon.

Thirty of the survivors, ranging in age from 22 to 73 years old, were identified as needing prostheses and other medical care. Vocational training was provided to 60 survivors and their family members, which included computer training classes to improve their skills, enabling them to become more competitive in the job market.

SRI LANKA

Mine Detection Dog Partnership Program in Sri Lanka

There are estimates of more than a million landmines laid in the north and east of Sri Lanka during the country's 25 year civil war. There have been a total of 21,993 landmine casualties since the 1980s and many people's lives remain at risk.

Since 2004, MLI has partnered with the U.S. Department of State and generous private donors to send 24 Mine Detection Dogs to Sri Lanka. In 2012, MLI donated **7 new dogs** to the Humanitarian Demining Unit (HDU). *MDD Karna* and *MDD Chandi* were sponsored by the London Stock Exchange Group while *MDD Baccus*, *Bael*, *Sammy* and *Boris* were donated by an Anonymous Foundation. The US Department of Defense sponsored *MDD Bennett*. MLI paired the new dogs with Sappers from the Sri Lankan Army's Engineering Regiment and began training, which should lead to MDD Team certification in 2013.

SRI LANKA

The five active MDD teams searched **64,063 square meters**, or nearly **16 acres**, of land in 2012. They located 99 mines, 19 hand grenades, one mortar round, and numerous pieces of small ammunition. The **seven new teams that were donated in early 2012** were trained and now meet international standards for certification. They will be a great help in clearing contaminated land in Sri Lanka.

During 2012, the five active dog teams searched more than **3 acres** of mine-contaminated land outside of the village of Chundikulam. The village is located along the north-eastern coast of Sri Lanka and is populated with fishermen who rely on access to the ocean to feed their families. Despite heavily concentrated areas of landmines, the people of Chundikulam were forced to venture into mine fields and contaminated beaches to access the water and maintain their livelihood. This area is now finally safe, thanks to the help of MLI's mine detection dogs (MDDs *Jeckie*, *Lil' Swoop*, *Spartacus*, *Yankee*, and *Madjesty*) and all of our generous donors who support this vital program.

YEMEN

Survivors' Assistance & CHAMPS Programs

Civil war and conflicts dating back to the early 1960s have left Yemen heavily contaminated with landmines and Unexploded Ordnance (UXO) that kill and wound thousands of Yemeni civilians each year. In 2010, MLI began a partnership with the Yemen Executive Mine Action Center (YEMAC) and the Yemen Association for Landmine Survivors (YALS) to provide the care, rehabilitation, and reintegration that is desperately needed by landmine survivors.

In 2010, MLI, YEMAC, and YALS built a state of the art computer center in Sana'a with funding from the U.S. Department of State. Using this facility, dozens of landmine survivors have taken computer training classes to enhance their employment opportunities. Others use the facility at minimal cost to support YALS' activities.

Additionally, in 2011, MLI initiated CHAMPS in Yemen and paired four US schools from Tennessee, Texas, Maryland and Pennsylvania with two Yemeni schools via video calls to raise landmine awareness and to help young survivors. During 2011-2012, **American students mobilized their schools and communities to raise over \$8,000 for survivors.**

MRE Training in Yemen (Top) & Children on Video-call (Middle) & Survivor Mohammad using his new prosthetic arm (Bottom)

YEMEN

Survivors' Assistance & CHAMPS Programs

Through CHAMPS, MLI was able to help **four young children** in Yemen who had been injured by landmines, providing them with new prosthetic legs and physical therapy. MLI also provided funding for medication and surgery for **two boys** who needed operations to remove remaining mine fragments from their bodies.

Samar is a 15 year old girl who was injured by a landmine several years ago. She is outgoing and exceptionally intelligent, and before the accident she enjoyed going to school and herding the family's animals. One Monday, in a spot very near to the area where her brother lost his left leg and their grandfather was killed by a landmine, Samar stepped on a mine. Her recovery has been slow and difficult. With MLI's assistance, she has finally received some needed medical care and has, so far, undergone two surgeries to remove the many pieces of metal that remained in her body. In spite of the hardships she has faced, she has remained optimistic and in good spirits, saying that someday she will, "be able again to come back to that beautiful world surrounded by lots flowers and love."

Chandi, gift of the London Stock Exchange Group

Special Thanks

MLI is deeply appreciative of the US Department of State's Office of Weapons Removal and Abatement (PM/WRA), which has been a loyal and generous supporter of MLI since 1998.

MLI would like to extend our thanks to Dr. Janice and John Homan, owners of the Seneca Hills Animal Hospital, Resort & Spa, who have volunteered their services as the official CHAMPS veterinarian.

2012 CHAMPS SCHOOLS

MLI is deeply appreciative of the dedicated students, parents, and teachers from communities throughout the U.S. who participated in CHAMPS during 2012. Working to become part of the solution for the global landmine epidemic, they raised thousands of dollars to support landmine survivors and to sponsor Mine Detection Dogs.

2012 Participating CHAMPS Schools

Brewster Middle School
Brunswick School
Central Jr. High School
Central Middle School
Challenger High School
Community School of Davidson
Darien High School
