About Us

MLI President Perry Baltimore gets ready to conduct a mine detection demonstration with Canine Ambassador Yankee during the UXO/Demining Caucus meeting on Capitol Hill on April 4, 2019
Our Year at a Glance

1,271,663 m² of land searched in Azerbaijan, Bosnia and Herzegovina, Iraqi Kurdistan, Lebanon, and Sri Lanka

167 landmine survivors received medical assistance, prosthetic limbs and vocational training

5,466 children received mine risk education through CHAMPS

9 Mine Detection Dogs donated to Azerbaijan, Bosnia Herzegovina, and Sri Lanka
Who We Are

The Marshall Legacy Institute (MLI) is a Virginia-based 501(c)(3) nonprofit organization that was founded by General Gordon R. Sullivan (Ret.) in 1997 to extend the vision of Nobel Peace Prize laureate George C. Marshall and the Marshall Plan to help war-torn countries recover from conflict and regain stability. MLI’s mission is to locate, secure, and apply skills and resources to alleviate suffering, restore hope, and create conditions that nurture stability in countries affected by conflict. For many nations, a primary obstacle to achieving sustainable progress is the deadly legacy of landmines and other unexploded ordnance, lethal reminders of armed conflicts that, in many cases, are long over. Landmines cause lasting environmental degradation, inhibit agricultural production, impede economic growth, slow the return of refugees, cause terror, and kill and maim innocent people and animals daily.

In Mine Action, our efforts include the development and implementation of the Mine Detection Dog Partnership Program (MDDPP), which provides mine detection dogs (MDDs) and Explosive Detection Dogs (EDDs) to accelerate the pace of landmine clearance operations; the Children Against Mines Program (CHAMPS), which promotes global citizenship and engages American youth in service learning projects to help children living in war-torn countries; and the Survivors’ Assistance program, which helps those injured by landmines acquire prostheses and attend vocational training courses to help them reintegrate into their communities. These programs (1) educate citizens about the dangers of mines, (2) provide valuable resources for landmine clearance, especially MDDs and EDDs, (3) train national leaders charged with mine-action responsibilities, and (4) assist landmine survivors with physical and psychological needs.

MLI’s Social Impact programs (Inter-Ethnic Reconciliation, Women’s Empowerment, and Leadership Development) aim to go beyond providing assistance to countries to help them overcome the physical and economic burden of landmines by enabling communities in post-conflict countries live more fulfilling lives. Our Social Impact programs rebuild peace, promote leadership among youth, and put a strong emphasis on the empowerment of women and the improvement of their role in society.
WHERE WE WORK

For the past 22 years, MLI has strived to assist severely mine contaminated countries by helping them help themselves. MLI advocates for affordable and sustainable programs.

By the end of 2019, MLI:

- Provided 253 mine and explosive detection dogs to 11 war-torn countries, and trained certified indigenous handlers to safely employ the dog teams in national landmine clearance program;

- Engaged tens of thousands of youth around the world in the global landmine issue;

- Provided critically needed medical assistance, prosthetics, mobility devices, and vocation training to hundreds of landmine survivors.
2019: Azerbaijan, Bosnia & Herzegovina, Iraq, Lebanon

2019: Bosnia & Herzegovina and United States

2003-2019: Afghanistan, Bosnia & Herzegovina, Iraq, Lebanon, United States, Vietnam, and Yemen

2019: Bosnia & Herzegovina and Yemen

PROGRAM OVERVIEW

MDDPP Facts
Launch year: 1999
Active MDDs by end of 2019: 68
MDDs donated in 2019: 9
EDDs donated in 2019: 0
MDDs and EDDs donated since launch: 253
Land searched in 2019: 1,276,663 m²
Land searched since launch: 51,493,873 m²

CHAMPS Facts
Launch year: 2003
MDDs sponsored since launch: 46
Survivors assisted in 2019: 167
Participating American schools in 2019: 23
Participating foreign schools in 2019: 7
Mine Risk Education provided to: 5,466

Survivors’ Assistance Facts
Launch year: 2003
Survivors who received medical assistance and vocational training in 2019: 1,466
Types of assistance: prosthetic limbs, rehabilitative care, and mobility devices; vocational training.
MLI’s longest running program is the Mine Detection Dog Partnership Program (MDDPP). The program utilizes government and private donations to purchase, train, and deliver Mine Detection Dogs (MDDs) and Explosive Detection Dogs (EDDs) to local demining organizations within mine-affected countries. Since the launch of the MDDPP in 1999, MLI has donated 253 lifesaving canines and provided the requisite training to successfully incorporate them into dozens of demining organizations worldwide. Our MDDs and EDDs have searched more than 50 million square meters of mine-contaminated land, returning it to the people for safe and productive use in agriculture, economic, and social development.

In 2016, MLI expanded the MDDPP to include the training and donation of Explosive Detection Dogs, or EDDs. The first 4 EDDs were donated to the Ministry of Peshmerga in Iraqi Kurdistan, to help them bring greater security to the region in the midst of ongoing conflict.

MDDs and EDDs are a crucial component of mine action programs because of their incredible sense of smell, which allows them to “sniff out” the explosive odors of landmines. Unlike metal detector tools commonly used in demining, a dog is able to locate both metal and plastic landmines. MDDs and EDDs work in teams with human handlers. Such a team can search up to 30 times faster than a manual deminer without compromising accuracy.
When properly integrated with other technologies (manual demining and machines), the mine/explosive detection dog team is an incredibly valuable tool for detecting mines and explosives. None of MLI’s MDDs or EDDs have ever been killed or injured while on the job.

MDDs and EDDs donated by MLI

In 2019, MLI donated 2 MDDs to Bosnia Herzegovina, and assisted the U.S. Department of State in transferring 4 MDDs to Azerbaijan and 3 MDDs to Sri Lanka from Syria.

*The count for active MDDs in Azerbaijan and Bosnia & Herzegovina include reassigned MDDs from Afghanistan and Armenia.

Retired MDDs and EDDs

After a lifetime of saving lives, our dogs retire to enjoy the rest of their lives with their handlers or, when that is not possible, MLI finds them loving homes in the United States.

Fig. 1: MDDs and EDDs by country

The figure below displays the total number of MDDs and EDDs provided to each country and how many of them were actively working by the end of 2019.
Children Against Mines Program (CHAMPS)

In 2003, MLI’s Children Against Mines Program (CHAMPS) was established by Diana Enzi, wife of Senator Mike Enzi. This unique program promotes global citizenship and engages American children on the landmine issue, something they unlikely would otherwise be exposed to. MLI’s CHAMPS team travels throughout the United States with our K9 ambassador, a retired Mine Detection Dog, to spark interest among American youth in global issues, inspire them to explore the landmine problem and become part of the solution.

Through CHAMPS, students raise funds to sponsor lifesaving MDDs and provide medical assistance and prosthetic devices to landmine survivors. The children’s hard work and dedication has led to the sponsorship of 44 MDDs and has helped hundreds of landmine survivors in the 15 years since the program’s launch. CHAMPS also links U.S. schools with schools in mine-affected countries, enabling American kids to work together in service projects that help children around the world who have been injured by landmines and to help prevent more tragedies through mine risk education. American children have conducted video-conference calls with youth in Afghanistan, Bosnia & Herzegovina, Iraq, and Yemen.

Peacemakers & Problem Solvers

MLI piloted PMPS in 2018 with students in a Maryland school and a school in Colombia. While PMPS safeguards the main elements that have made CHAMPS a success, such as peer-to-peer engagement and collaboration on projects that positively impact marginalized communities; it also offers students leadership opportunities, a comprehensive curriculum focused on conflict management and problem solving, and a structured process to develop and manage small localized projects.
Each year, innocent men, women and children are injured or killed by landmines or other dangerous explosives. The increase in the use of IEDs by insurgent groups in the past few years in countries such as Iraq and Yemen has not only endangered civilians as they go about their day-to-day lives, but has also prevented internally displaced persons from returning home.

Children who are injured by landmines often times suffer greater physical injuries and emotional trauma, and have significantly bleaker economic prospects than adults. In many war-torn countries, they have little chance of getting a prosthetic limb or even a wheelchair. With little to no mobility, they may be unable to attend school, making them dependent upon their families and sequestered in their homes.

MLI’s Survivors’ Assistance Program provides assistance to those who have been injured by mines and other dangerous explosives. MLI provides prosthetic devices, rehabilitative treatments, and vocational training to dozens of landmine survivors every year.

When landmines and explosives no longer pose barriers to communities, the communities will be faced with other dilemmas: the financial burdens and responsibility to ensure their and their families’ wellbeing.

In 2019, 82 landmine survivors in Yemen received medical care and an additional 70 survivors received vocational training based on their skills and preferences. An additional 15 survivors received assistance in Bosnia & Herzegovina and Yemen through CHAMPS. Survivors received vocational training in sewing, handicrafts, carpentry, weaving, beekeeping, and poultry production.

“I thank the Yemeni Association for Landmine Survivors and MLI, which provided a prosthetic leg to help my daughter fulfil her life without feeling helpless.”

- Mother of 4 year old landmine survivor Ala’a in Yemen

IRAQ

YEMEN

SRI LANKA

LEBANON
MLI’s partnership with the Azerbaijan National Agency for Mine Action (ANAMA) started in 2005, with a donation of seven mine detection dogs to increase the nation’s demining capacity. Since then, MLI continued to expand the MDD Partnership Program in Azerbaijan and by 2019, had provided 40 MDDs to ANAMA. These dogs have searched over 29 million square meters of land in their working years. Four of the MDDs were sponsored by American children through MLI’s CHAMPS campaigns.

In 2019, MLI facilitated the transfer of four MDDs from Syria to ANAMA. These dogs had previously worked under a U.S. Department of State contract in Syria. Over the summer, ANAMA provided in-depth training for the four MDDs at their Regional Training Base in Fizuli.

Throughout the year, other MDDs donated by MLI to ANAMA searched 866,000 square meters of land throughout Azerbaijan, to include Jojug Marjanli, located in the Jabrayil district on the border of Nagorno Karabakh. The Azeri government started reconstruction of the town in 2016 after Azeri troops regained access to this disputed territory by building schools and homes, and most importantly, ensuring that the land was safe before people were allowed to return. In the last quarter of 2019, ANAMA’s MDD teams located 179 unexploded ordnance (UXO) devices, clearing the way for Azerbaijani communities to use the land safely for agriculture, housing, and economic development.
Quick Glance at Azerbaijan

29,075,872 m² of land searched since 2005

33 MDDs donated by private Americans and 7 MDDs reassigned from Afghanistan

7 MDDs active by the end of 2019

Bo, Sonny, Tori, and Moto arrive in Azerbaijan where they were relocated to assist with mine clearance efforts through the Azerbaijan National Agency for Mine Action (ANAMA)

MDD and handler performing a roadside clearance operation
Nearly 25 years have passed since the end of the Bosnian War, and landmines and unexploded remnants of war continue to haunt the Balkan nation. MLI began working in Bosnia after developing a strong partnership with the Bosnian-based Mine Detection Dog Center (MDDC) in 2004. Since, MLI has provided 46 MDDs to the MDDC and nine other indigenous demining organizations. These highly trained canines have helped to search millions of square meters of land during their working lives. Fourteen of the MDDs have been sponsored by CHAMPS students.

In April, MLI launched the Mine Free Sarajevo project in partnership with ITF Enhancing Human Security and the MDDC. This project is funded by the U.S. Department of State and it will render mine free the capital city of Sarajevo and surrounding municipalities. MLI’s role in the project is coordinating activities, monitoring and evaluation, and publicity. MLI plans to hold a ribbon cutting ceremony once the project is completed in 2020. Toward the end of 2019, clearance activities were completed in one of the five project municipalities.
Quick Glance at Bosnia

3,066,056 m² of land searched since 2004

36 MDDs donated since 2004; 4 MDDs transferred from Afghanistan and 6 MDDs transferred from Armenia

11 MDDs active by end of 2019

5,466 students and community members received mine risk education in 2019

MDD and Handler in Bosnia
CHAMPS Bosnia

In addition to assisting Bosnia in its demining efforts, MLI has been connecting American and Bosnian children, and providing assistance to landmine survivors through CHAMPS since 2006.

Participating Bosnian and American CHAMPS schools engage in group video calls so that students can get to know one another, exchange ideas as they raise awareness about landmines and raise funds to provide medical assistance & rehabilitation to survivors. Led by their teachers and MDDC instructors, the Bosnian students are taught mine risk education (MRE). Then, they participate in spreading this lifesaving knowledge by conducting presentations for other children and teachers in their schools and communities.

CHAMPS students also frequently participate in MRE activities with the internationally recognized Fantomi Sitting Volleyball Club, which is comprised of individuals who have lost limbs to landmines in Bosnia.

Each participating Bosnian CHAMPS school, while dominated by a different ethnic majority (Bosniak, Croat, or Serb), is also a part of MLI’s interethnic reconciliation program. By working together on projects to help landmine survivors and promote MRE in mine-affected communities, the youth have the opportunity to break down decades-long ethnic hostilities. Putting aside ethnic and religious differences, youth form friendships and develop mutual understanding. A total of 180 Bosnian students from six schools participated in the 2019 CHAMPS program.
Survivors’ Assistance Bosnia

With assistance from the MDDC, 20 landmine survivors received prosthetics and medical assistance in Bosnia in 2019. Many of the survivors met with CHAMPS students and shared how grateful they were to receive this assistance.

Selma Gušo, a landmine survivor who lost her leg when she was only 9 years old, received MLI’s 2019 Survivors’ Assistance Award. Selma’s father had been in the Bosnian Army during the war and brought his family, including Selma, to the area where he fought for a visit, during which Selma stepped on a landmine. She was immediately rushed to a hospital in Sarajevo where she underwent multiple surgeries and rehabilitation over the next three months.

Despite the physical and emotional trauma, Selma continued to pursue her studies to graduate high school and receive her Bachelor’s degree. Selma regularly speaks at functions and events that support women and people with disabilities. By sharing her story, she has been able to help many other women overcome their fears and challenge barriers. Selma traveled to Washington, DC to receive her award during MLI’s Clearing the Path Gala.

Honoree Selma Gušo (second from right) receives the Survivors’ Assistance Award at MLI’s 2019 Clearing the Path Gala
MLI launched the Peacemakers and Problem Solvers (PMPS) program in March 2018 by virtually connecting students of Poolesville High School in Maryland with students at the Laura Montoya Diocesano School in Chigorodo, Colombia. PMPS provides students the opportunity to cultivate leadership skills, think critically about the world around them, and work collaboratively with students in other countries on social impact projects, taking them from concept to completion.

Through PMPS, students in both countries identify a shared social issue in their communities and design a project with a set of activities that will aim to address the issue. The goal is for the students to observe how a similar issue may manifest itself differently in both communities.

To strengthen connections between their groups, the students regularly chat on WhatsApp, create “Day in the Life” videos, and participate in monthly video-conference calls with MLI and PMPS educators. In 2019, the PMPS students in Maryland and Colombia continued to meet via the calls and chat through social media. The Maryland students implemented two series of PMPS workshops focused on peacebuilding, communication and conflict-resolution for elementary school students in their communities as part of their service learning projects. The Colombian students have also begun to implement similar workshops for elementary-aged students at their school, where violence is prevalent.

PMPS students follow a specialized curriculum designed for the program. The curriculum features topics such as conflict management, time management, project design, and teamwork to help the students think critically about the issues that impact their communities and what they can do to create a positive impact. MLI’s Colombia Program Manager traveled to the Laura Montoya Diocesano School in November to implement a one-day in-person workshop, where she delivered additional curriculum and conducted PMPS-focused exercises with the students.

Laura Montaya Diocesano School PMPS students, Colombia
MLI commenced its work in Iraqi Kurdistan in 2009 by assisting the demining organization MAG in establishing an MDD capacity within its local unit.

In the Spring of 2016, the Ministry of Peshmerga requested MLI’s assistance in clearing Kurdish land of mines and improvised explosive devices (IEDs) left in the wake of ISIS. The first four EDDs of the eighteen requested dogs were provided to the Peshmerga in October 2016. These EDDs have worked between 2017 and 2019 to search vehicles, buildings, and land of hidden explosives, assist in the rebuilding of homes and hospitals, and help people return home.

MLI provided the remaining 8 EDDs and 6 MDDs to the Ministry of Peshmerga in 2018. Two of the EDDs were sponsored by CHAMPS students this fall. This year, MLI assisted the Peshmerga in caring for the dogs and worked with the non-profit organization Spirit of America to provide dog food and Personal Protective Equipment to the Peshmerga forces.
Quick Glance at Iraq

- **25 MDDs** donated (12 to southern Iraq, 13 to Kurdistan) since 2009
- **12 EDDs** donated to Kurdistan since 2016
- **1,848,436 m²** of land searched since 2009

*MDD Scout with handler in Iraq*
MLI has held a lasting partnership with the Lebanon Mine Action Center (LMAC) since 2001. LMAC, which operates within the Lebanese Armed Forces (LAF), executes and coordinates Lebanon’s mine action program. Lebanon’s southern and northern provinces suffer from landmines left behind after a 15-year civil war and multiple conflicts with Israel.

MLI’s training and donation of 6 mine detection dogs in 2001 helped to establish LMAC’s MDD capacity and expedite the organization’s demining operations. Since then, MLI has donated a total of 36 MDDs and 3 EDDs to LMAC, which have helped to search 250 acres of mine-contaminated land. In 2019, the MDDs searched 38,300 m² of land, which directly benefited 2,275 people. This land is used for agricultural purposes, development of housing areas, and improving infrastructure.
Quick Glance at Lebanon

- **39 MDDs** and **EDDs** donated to Lebanon Mine Action Center
- **1,093,025 m²** of land searched since 2001
- **209 survivors** have received vocational training since 2009
- **215 survivors** received medical assistance and were fitted for prosthetic limbs

*EDD Bingo training in April 2019*
In the aftermath of three decades of civil war, Sri Lanka faced an arduous task of reclaiming vast tracts of land littered with landmines. The island nation’s northern districts bear the majority of this burden. An increase in mine action efforts since 2016 decreased the amount of contaminated land substantially and are helping Sri Lanka get closer to its goal of becoming completely mine-safe.

MLI’s partnership with the Sri Lankan Army Engineer Regiment’s Humanitarian Demining Unit (SLA HDU) began in 2003 with an initial donation of 13 MDDs. Since then, MLI donated an additional 21 MDDs to Sri Lanka, bringing the total to 34. All of these MDDs have performed remarkable work, facilitating clearance operations and allowing Sri Lanka to return land to its people.

This year, MLI facilitated the U.S. Department of State to transfer seven dogs from Syria to Sri Lankan and Azerbaijan. Three of the dogs were donated to the HDU and MLI’s Master MDD Trainer delivered a three-week integration training course at the Boo Oya Camp for the three dogs and their new handlers. MLI’s donated MDDs helped the HDU search 142,066 square meters of land throughout 2019.

A Mine Detection Dog team from the HDU was selected as MLI’s MDD Team of the Year in 2019. MDD Sammy and her handler Lance Corporal Nishantha Bandara were honored for their bravery, dedication, professionalism and outstanding performance. The team traveled to Washington, DC for MLI’s Clearing the Path Gala and visited CHAMPS schools, the Embassy of Sri Lanka, and Capitol Hill. As MDD Sammy was subsequently retiring, the Sri Lankan Army permitted MLI to keep her as our newest K9 Ambassador. After her retirement, Sammys started to conduct mine detection demonstrations to promote landmine awareness.
Quick Glance at Sri Lanka

1,380,900 m² of land searched

34 MDDs donated to the Sri Lankan Army’s Humanitarian Demining Unit

12 MDDs active by end of 2019

The ongoing conflict and perpetual violence in Yemen continue to relentlessly destroy livelihoods, families, and people’s futures. While thousands of schools remain closed, children find themselves at an increased risk of suffering injuries or death as more landmines continue to be planted into the ground.

MLI’s partnership with the Yemeni Association for Landmine Survivors (YALS) has enabled us to continue providing assistance to the most vulnerable people through our CHAMPS and Survivors’ Assistance programs. YALS, a local organization, helps landmine survivors reintegrate into society.

In July, MLI extended its Survivors’ Assistance program in Yemen through the support of the Department of State. Through this lifesaving and life-enhancing program, MLI provides medical assistance and vocational training assistance for Yemeni landmine survivors. In 2019, 82 survivors received medical assistance and 70 survivors were trained in vocational skills. Female landmine survivors received vocational training in sewing, and male landmine survivors participated in carpentry and weaving vocational courses.

Micro-grants, another substantial component of the program, are provided to graduates of previous vocational training courses. Interested graduates must prepare and submit business plans to YALS and MLI for evaluation. The micro-grants have helped the beneficiaries start their own sewing, beekeeping, and carpentry businesses.

This fall, MLI received a request from the Yemeni Ministry of Defense to provide 20 MDDs and training and field supervision for handlers operating under the Yemeni Executive Mine Action Center. MLI has conducted a fact-finding mission to determine the efficacy of the requirement. MLI is exploring available options we can undertake to meet the request of the Ministry of Defense and help the Yemeni people.
Quick Glance at Yemen

82 landmine survivors received prosthetics and medical assistance in 2019

70 survivors completed vocational training courses in sewing, carpentry, weaving, handicrafts, and beekeeping in 2019

Tefka, gift of Royal Dutch Shell  

“The CHAMPS program allows students to be global citizens. The traditional walls of the classroom are removed and the learning environment is extended exponentially. In a school district that has been ravaged by budget cuts, The CHAMPS program has been there each and every year to enrich the lives of the students in my class; it has given the students a reason to attend school, as well as, realize how powerful they can be as agents of change.”
