ABOUT US

The Marshall Legacy Institute (MLI) is a Virginia-based 501(c)(3) nonprofit organization founded by General Gordon R. Sullivan (Ret.) in 1997. Our goal is to extend the vision of Nobel Peace Prize laureate George C. Marshall and the Marshall Plan, assisting war-torn countries in their recovery from conflict and aiding in their return to stability. MLI's mission is to locate, secure, and apply resources to alleviate suffering, restore hope, and create conditions that foster stability in conflict-affected communities. The deadly history of landmines and other unexploded ordnances are lethal reminders and primary obstacles to achieving safe conditions. Landmines cause lasting environmental degradation, inhibit agricultural production, impede economic growth, slow the return of refugees, and threaten innocent people and animals.

In Mine Action, our **Mine Detection Dog Partnership Program (MDDPP)** provides highly trained mine detection dogs (MDDs) and Explosive Detection Dogs (EDDs) to accelerate the pace of landmine and ordnance clearance operations; the **Children Against Mines Program (CHAMPS)** promotes global citizenship and engages American youth in service-learning;

and the **Survivors' Assistance program** helps landmine survivors acquire prostheses and attend vocational training courses to gain independence and reintegrate into their communities.

These Mine Action programs:

- (1) educate citizens about the dangers of mines
- (2) provide valuable resources for landmine detection, especially MDDs and EDDs
- (3) train national leaders charged with mine-action responsibilities
- (4) assist landmine survivors with physical and psychosocial needs.

MLI's **Social Impact programs** focus on Leadership Development, Inter-Ethnic Reconciliation and Women's Empowerment, which promote leadership among youth, rebuild peace, and emphasize the empowerment of women and the enhancement of their role in society.

The Social Impact programs seek to empower communities coming out of conflict that are suffering from the economic burden caused by landmines. Our social impact programs help develop economic and human capital to improve lives and livelihoods.

2021 AT A GLANCE

2,642,190 m2 of mined land searched by MLI dogs

51,766 people received mine risk education in Bosnia & Herzegovina

48 active Mine Detection Dogs in 5 countries

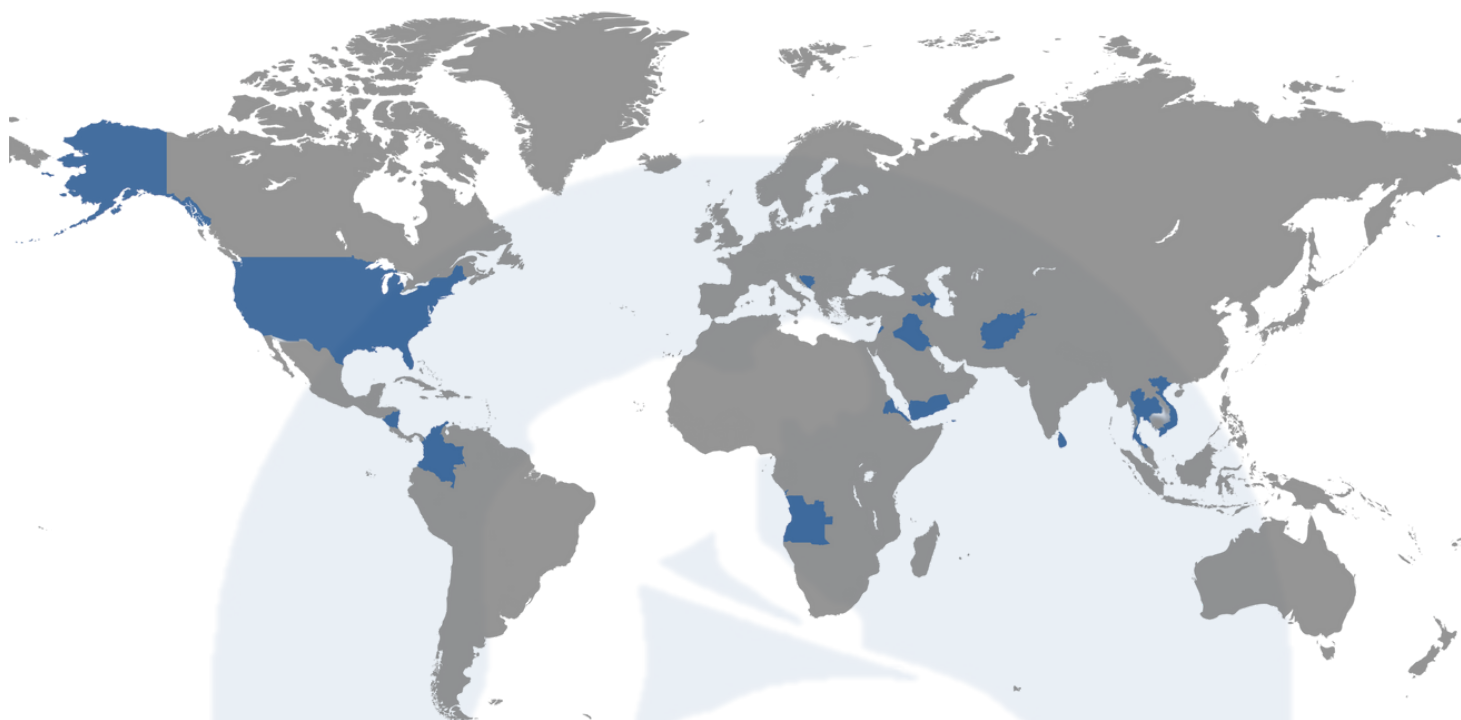

403 students took part in our leadership development programs (CHAMPS, Peace Makers and Problem Solvers, Peace Through Sport)

172 landmine survivors received prosthetic limbs & vocational training in Bosnia & Herzegovina and Yemen

WHERE WE WORK

For the past 24 years, MLI has helped mine contaminated countries to stabilize their communities and recover from conflict. Landmine detection, landmine survivors' assistance, and youth leadership development are MLI's main tools for providing affordable and sustainable solutions.

PROGRAM OVERVIEW

MDDPP Facts

Mine Detection Dog Partnership Program

Launch year: 1999

MDDs and EDDs donated since 1999: 273

Active MDDs by end of 2021: 60

Land searched in 2021: 2,642,190 m²

Land searched since launch: 52,645,157 m²

CHAMPS Facts

Children Against Mines Program

Launch year: 2003

MDDs sponsored to date: 47

Participating U.S. schools in 2021: 4

Participating foreign schools in 2021: 6

People who received Mine Risk

Education in 2021: 32,480

Survivors' Assistance Facts

Launch year: 2003

Survivors who received assistance to date: 1,775

Survivors who received medical assistance & vocational training in 2021: 172

Types of assistance: **prosthetic limbs, rehabilitative care, mobility devices, & vocational training**

MINE DETECTION DOG PARTNERSHIP PROGRAM

MLI | 09

(MDDPP)

The Mine Detection Dog Partnership Program (MDDPP) is MLI's longest-running program. The program utilizes government and private donations to purchase, train, and deliver Mine Detection Dogs (MDDs) and Explosive Detection Dogs (EDDs) to local demining organizations within mine-affected countries. Since the launch of the MDDPP in 1999, MLI has donated over 273 lifesaving canines and provided the requisite training to successfully incorporate the dogs into dozens of demining organizations worldwide. Our MDDs and EDDs have searched just under 53 million square meters of mine-contaminated land, returning it to the people for safe and productive use in agriculture, economic, and social development.

In 2016, MLI expanded the MDDPP to include the training and donation of Explosive Detection Dogs (EDDs). The Kurdish Region of Iraq, Lebanon, and Azerbaijan are among the beneficiaries who have received EDDs from MLI, generously sponsored by private American donors.

MDDs and EDDs are valuable tools for mine action programs because of their incredible sense of smell, which allows them to "sniff out" the explosive odors of landmines and other explosive devices. Unlike the metal detector tools commonly used in demining, a dog is able to locate both metal and plastic landmines. MDDs and EDDs work in teams with human handlers. Such a team can search up to 30 times faster than a manual deminer without compromising accuracy.

MDD Astor works in the field with her handler in Lebanon

MINE DETECTION DOG PARTNERSHIP PROGRAM

(MDDPP)

When properly integrated with other technologies (manual demining and machines), the mine/explosive detection dog team is an incredibly valuable tool for detecting mines and explosives. None of MLI's MDDs or EDDs have ever been killed or injured while on the job, a testament to the quality of the dog, the intensive training they receive, and the bond they share with their handlers.

MDDs and EDDs donated by MLI

In 2021, MLI donated 20 MDDs to the Mine Action Agency of the Republic of Azerbaijan (ANAMA). As part of an agreement to provide 30 MDDs to ANAMA between 2021-2023, the Government of Azerbaijan sponsored 12 of the 20 MDDs, while MLI's private donors sponsored the remaining eight dogs.

MDD Lea in the field in Azerbaijan

Retired MDDs and EDDs

After a lifetime of saving lives, our dogs retire to enjoy the rest of their lives with their handlers or, when that is not possible, MLI finds them loving homes in the United States.

MDD Gizmo, MDD Simone, & their handlers in Bosnia-Herzegovina

How are the dogs trained?

Young K-9s (German Shepherds or Belgian Malinois) are brought to our partner training facilities at the Mine Detection Dog Center in Bosnia & Herzegovina (MDDC) in Sarajevo or the Global Training Academy (GTA) in Somerset, Texas. The dogs spend 3-5 months in training, building the skills to detect and respond to explosive odors commonly found in landmines. Once they pass their final training exams, the dogs are accompanied by a trainer and delivered to the country where they will serve. MDDs are given time to acclimate to their new environment and paired with a local handler for intensive training and accreditation. Once the teams are certified to international standards, the dogs begin their lifesaving work in the field.

CHILDREN AGAINST MINES PROGRAM

(CHAMPS)

In 2003, MLI's Children Against Mines Program (CHAMPS) was established by Diana Enzi, wife of Senator Mike Enzi. This unique program promotes global citizenship and educates American children on the impact of landmines, an issue they would be unlikely to otherwise encounter. MLI's CHAMPS team travels throughout the United States with our K9 Ambassador, a retired Mine Detection Dog (MDD), to spark interest among American youth on this global issue, inspire them to explore more about the landmine problem, and empower them to become part of the solution.

Through CHAMPS, students raise funds to sponsor life-saving MDDs and provide medical assistance and prosthetic devices for landmine survivors. Since the program's launch, our dedicated CHAMPS students have sponsored 47 MDDs and helped hundreds of landmine survivors.

CHAMPS students at North Mianus School pose with K9 Ambassador MDD Sammy and MLI Executive Director Perry Baltimore

CHAMPS also links U.S. schools with schools in mine-affected countries, enabling American kids to work with their international peers to conduct service projects. Through these joint efforts, US students help children around the world who have been injured by landmines and aid in the prevention of more tragedies through mine awareness education. CHAMPS has connected American children through video-conference calls with youth in Afghanistan, Bosnia & Herzegovina, Iraq, Lebanon, Vietnam and Yemen.

In 2021, 20 participating U.S. schools held 19 video calls with international students and landmine survivors. Due to the COVID-19 pandemic, many schools switched to virtual outreach. In 2021, schools returned to both in-person education and continued virtual efforts. While the pandemic altered the landscape of learning, it also led to more opportunities for virtual education and exchange programs like CHAMPS, providing kids with a global outlet despite COVID regulations.

CHAMPS students at Glenelg Country School watch a demonstration by K9 Ambassador MDD Sammy

PEACE MAKERS & PROBLEM SOLVERS

(PMPS)

MLI launched Peace Makers and Problem Solvers (PMPS) in 2018, uniting students in the United States with students in Colombia. Designed off the CHAMPS framework, the PMPS program develops leadership, empathy, communication, and project management skills in high school students. Its unique approach promotes practical application by incorporating peer-to-peer engagement and collaboration through small community-based service learning projects.

For the 2020/2021 school year, the PMPS students in Colombia and Maryland met virtually, on calls moderated by MLI staff. After completing the program curriculum, the students launched their service-learning projects to **promote healthier eating habits and access to higher education** in their communities.

Through PMPS, MLI united two schools in Maryland with one school in Colombia, bringing together 30 students. Despite difficulties in the wake of the COVID-19 pandemic, the students were able to connect through virtual exchange and tailor their projects to reach community members in a safe and meaningful way.

Starting in October 2021, MLI initiated a new program based on the PMPS model, Peace Through Sport (PTS). Funded by the U.S. Embassy in Lebanon, the program unites Lebanese students with youth in the U.S. through the lens of sport. PTS engages students in 8-week sessions, empowering them to generate change in their communities with sports-based learning.

SURVIVORS' ASSISTANCE

Each year, innocent men, women, and children are injured or killed by landmines or other dangerous explosives. In recent years, the increase in the use of improvised explosive devices (IED) by insurgent groups in countries such as Iraq and Yemen has endangered civilians as they go about their day-to-day lives and prevented internally displaced persons from returning home.

Landmine survivors face myriad physical and economic challenges. Adult survivors may be unable to afford prosthetic limbs and the rehabilitative care they need to lead productive lives. Children injured by landmines suffer physical injuries and emotional trauma. In many war-torn countries, children who are still growing have little chance of getting a prosthetic limb or wheelchair. With little to no mobility, they may be unable to attend school.

Landmine survivors also face barriers to their economic and financial well-being, providing a need for vocational skills to earn an income to support themselves and their family members.

MLI's Survivors' Assistance Program aids those who have been injured by mines and other dangerous explosives. MLI provides prosthetic devices, rehabilitative treatments, and vocational training to dozens of landmine survivors every year, including many children.

In 2021, 17 survivors received medical assistance through CHAMPS in Bosnia & Herzegovina. In Yemen, 83 landmine survivors received medical care and an additional 72 survivors received vocational training. Based on their skills and preferences, survivors received vocational training in sewing, handicrafts, carpentry, and weaving.

Since 2011, MLI's programs in Yemen have helped 430 survivors complete vocational training courses. Graduates from these courses have the opportunity to receive competitive micro-grants to help them expand their skills and start their own businesses.

Items made by landmine survivors in Yemen are available for purchase on the MLI website, with 100% of the proceeds going back to the survivor.

MDD teams conduct roll call

The 1988 to 1994 conflict between Azerbaijan and Armenia and the collapse of the Soviet Union left much of Azerbaijan littered with landmines. There are an estimated 9.4 million square meters of land contaminated by landmines, affecting more than 500,000 people. Additional contamination followed renewed conflict in 2020. The years of conflict has left Fizuli, Agdam and other regions in Azerbaijan riddled with mines.

Recognizing the threat that mines and unexploded ordnance (UXO) continue to pose to local communities, the Azerbaijan National Agency for Mine Action has developed an ongoing partnership with MLI to help alleviate the problem. As the in-country partner, ANAMA is responsible for overseeing all aspects of mine action activities, including clearance operations.

Since 2005 MLI has donated 60 lifesaving Mine Detection Dogs to ANAMA. These MDDs have helped to search more than 7,900 acres of contaminated land to date, saving and improving countless lives.

Land rendered free from the impact of mines with the help of MDDs has been subsequently utilized for agriculture, infrastructure development and other purposes.

In 2021 MLI provided 20 MDDs to ANAMA to assist with increased requirements for MDDs to address recent contamination. In 2021, MDDs donated by MLI to ANAMA searched 2.48 million m² of land in Azerbaijan, including the village of Jojug Marjanli, located in the Jabrayil district on the border of Nagorno-Karabakh. The Azerbaijani government began reconstruction of Jojug Marjanli in 2016 after troops regained access to the disputed territory. Once the land was deemed safe, school and home construction began and Jojug Marjanli's people were allowed to return home. This is an ongoing project.

In 2021, ANAMA's MDD teams located more than 1,700 pieces of unexploded ordnance (UXO), including antitank and antipersonnel landmines, clearing the way for Azerbaijani communities to use the land safely for agriculture, housing, and economic development.

BOSNIA & HERZEGOVINA

MDD Simone in training with her handler

Bosnia-Herzegovina remains contaminated by landmines more than 25 years after the end of the Balkan War. MLI initiated our Mine Detection Dog Program in Bosnia-Herzegovina in 2004, developing a close partnership with the Mine Detection Dog Center in Bosnia & Herzegovina (MDDC). With the support of the U.S. Department of State and private donors, MLI has provided 46 MDDs to demining organizations in Bosnia & Herzegovina, including 14 MDDs sponsored by CHAMPS students in the United States.

In 2021, MLI's 10 active MDDs searched 123,215 m² of land in Bosnia & Herzegovina. This land is now used for agricultural purposes and the development of community areas.

MDD Emily working with her handler Aziz

CHAMPS - BOSNIA & HERZEGOVINA

MLI launched CHAMPS in Bosnia & Herzegovina (BiH) in 2007, virtually connecting students in the U.S. and BiH. Participating students befriend each other, learn about each other's cultures, and work together to help mine survivors and raise awareness about the dangers of mines. Through virtual engagement, American students are introduced to landmine survivors, showing them the reality of the detrimental effects of landmines. CHAMPS empowers students to organize fundraising campaigns to generate the funding needed to provide medical assistance and other rehabilitative care for the survivors and to sponsor mine detection dogs.

In 2021, MLI continued to implement the CHAMPS Bosnia program, with funding provided by the U.S. Department of State. Each year, CHAMPS schools raise funds to provide medical care and prosthetic limbs to dozens of landmine survivors in BiH. Although the COVID-19 pandemic complicated CHAMPS calls between participating students in the U.S. and BiH, CHAMPS students persevered. In 2021, 17 landmine survivors in BiH received prosthetics/medical assistance through CHAMPS. Mine Risk Education (MRE) is another critical component of the CHAMPS Bosnia program, educating students and their communities about the dangers of landmines to preclude accidents and injury. Despite school closures and other challenges that continued due to the COVID pandemic, six schools in Bosnia-Herzegovina were paired with six schools in the United States for the CHAMPS program. In addition to connecting for monthly video calls, the students helped to provide assistance to 17 landmine survivors. Furthermore, the program provided critical Mine Risk Education to more than 46,000 people living in mine-threatened areas of Bosnia-Herzegovina.

CHAMPS Bosnia students at the Hadzici school

MINE FREE SARAJEVO - BOSNIA & HERZEGOVINA

In April 2019, the historic Mine Free Sarajevo project launched, forming a partnership between MLI, ITF Enhancing Human Security, and the MDDC. This project was funded by the U.S. Department of State and to release over 6 million m2 of mine-contaminated areas in Sarajevo, with the ultimate goal of rendering the capital city and surrounding municipalities free of mines for the first time in 25 years. MLI's role in the project was to coordinate activities, conduct monitoring and evaluating efforts, publicize the project, and organize a final celebratory event.

The COVID-19 pandemic briefly halted project operations in spring 2020, but the participating teams from the MDDC were ultimately able to move forward with their operations, and declare the City of Sarajevo mine impact-free. In September 2021, the project officially concluded, with more than 6.2 million square meters of land released from the municipalities of Stari Grad, Novi Grad, Istocni Stari Grad and Vogosca. 841 pieces of unexploded ordnance was found and destroyed.

MLI, the project partners and donor held a celebratory event in Sarajevo to commemorate the successful conclusion of the project in September 2021. MLI is deeply appreciative of the assistance and support of the project donor, the US Department of State, the US Embassy in Sarajevo, the local authorities and participating organizations, especially the Bosnia & Herzegovina Mine Action Center (BHMIC), the mayors of the affected municipalities, and the mayor of the City of Sarajevo for assisting in this important project.

2021 AT A GLANCE - COLOMBIA

4 Youth-led service learning projects implemented

231 Community members benefitted through youth-led projects

2 Colombian schools participated in PMPS
1 U.S. school participated in PMPS

Students at La Provincia school in Carepa, Colombia hold their certificates after completing the PMPS program

La Provincia School students participate in a PMPS conflict resolution exercise

COLOMBIA

MLI launched the **Peace Makers and Problem Solvers (PMPS)** program in March 2018 by connecting students of Poolesville High School in Maryland with students at the Laura Montoya Diocesano School in Chigorodo, Colombia. PMPS provides students with the opportunity to cultivate leadership skills, think critically about the world around them, and work collaboratively with students in other countries on social impact projects, taking them from concept to completion.

Through PMPS, students in both countries identify a shared social issue from each of their communities and design a project with a set of activities aimed at addressing the issue. The goal is to give the students an opportunity to observe how a similar issue may manifest itself differently in both communities.

To strengthen connections between their groups, the students regularly chat on WhatsApp, create “Day in the Life” videos showcasing their families and hobbies, and participate in monthly video-conference calls with MLI and PMPS educators.

PMPS students follow a specialized program curriculum, featuring topics such as conflict management, time management, project design, and teamwork. Students learn to think critically about the issues that impact their communities and recognize ways they can help create a positive impact.

La Provincia School students at their PMPS club, led by teacher Kevin Guerra (front right)

PMPS HIGHLIGHTS - COLOMBIA

In February, MLI launched a 12-week mentorship-training program for 15 PMPS student leaders and teachers in Colombia. The program was led by a Colombian mentorship coach to provide student leaders and teachers additional mentorship skills as they lead other youth through the PMPS program and curriculum.

MLI expanded PMPS with a second school in Colombia, the La Provincia school in Anioquia, northwestern Colombia. The new students participated in PMPS with their peers at Poolesville High School, Maryland.

Some of the service-learning projects PMPS students implemented in 2021 included:

- **Healthy Habits and Food Distribution (U.S.):** Students designed an awareness campaign to educate their community on creating healthy habits; students also distributed food to people affected by Covid-19.
- **Access to Higher Education and Development of Life Skills (Colombia):** PMPS youth gave talks to 11th grade students on how to access higher education, technical, and vocational training opportunities. Students also conducted workshops and organized soccer games and film viewings to teach elementary and middle school students socio-emotional abilities and life skills.

MLI awarded a PMPS Maryland student, Divya Mathur, with the Joan Wismer Student Leader Award at our 2021 Clearing the Path Gala. Divya received the award for her outstanding leadership and creativity. Divya ably led the Poolesville PMPS club through 2020 and 2021 until her graduation, and despite Covid-19 pandemic challenges, she creatively found ways to continue the club meetings online, and to design and implement the club's service learning projects.

2021 AT A GLANCE - IRAQ

2,119,732 m2 of land searched since 2009

16 Active Explosive and Mine Detection Dogs

25 Mine Detection Dogs donated since 2009

12 Explosive Detection Dogs donated since 2016

K9 Unit with EDDs

EDD Tom, sponsored by CHAMPS Connecticut

IRAQ

MLI began its work in Iraq in 2009 with the provision of six mine detection dogs to the demining organization MAG in the Kurdistan Region of Iraq (KRI). In 2010, MLI donated 12 MDDs and provided advanced training to the Iraq Mine and UXO Clearance Organization (IMCO) in central and southern Iraq. Operating in the Basra region, these MDD teams helped to accelerate the pace of landmine clearance operations.

In 2016, the Ministry of Peshmerga in KRI requested MLI's assistance to help clear land in the KRI of mines and improvised explosive devices (IEDs) left in the wake of ISIS. MLI subsequently provided 12 EDDs and 6 MDDs, significantly increasing the Peshmerga K9 Unit's capacity. Throughout 2021, the EDD teams conducted searches of more than 1,000 vehicles, buildings, homes, and 8,000 square meters of roads to ensure safe passage.

EDD teams also searched for IEDs on the front lines of Qarachog Mountain, located south of Erbil, where the Peshmerga Army continues its fight against remaining ISIS soldiers.

In December 2021, MLI's MDD Trainer traveled to KRI to conduct an assess and assist visit of the MDD and EDD teams. The trainer concluded that several of the EDDs should receive refresher training and that the needs of the Peshmerga K9 Unit's operations are better suited for the work of EDDs as opposed to MDDs. MLI thereby commenced communications with the MoP's leadership to design a strategy and plan to provide the refresher training and retraining of MDDs to EDDs.

PTS students in Lebanon play a team-building game

LEBANON

MLI has maintained a lasting partnership with the Lebanon Mine Action Center (LMAC) since 2001. Operating within the Lebanese Armed Forces (LAF), LMAC coordinates Lebanon's mine action program. Following a 15-year civil war and multiple conflicts with Israel, Lebanon's southern and northern provinces were left riddled with landmines. Donating six mine detection dogs in 2001, MLI helped establish LMAC's MDD capacity and expedite the organization's demining operations. Since then, MLI has donated 36 MDDs and three EDDs to LMAC. These dogs have searched and released 1,114,875 m² of mine-contaminated land since 2001.

MDD Roni poses in the training field

Searching cars, ports, and buildings for safe access, three EDDs worked with LMAC in 2021. These K9 heroes helped clear areas for safe events, like the one-year anniversary of the explosion in Beirut.

In 2021, six MDDs searched 4,500 m² of land, directly benefiting over 100 people. Although harsh weather conditions limited the work season, the MDDs and EDDs used the extra time to sharpen their training. The land cleared is now used for agricultural purposes, the development of housing areas, and the improvement of infrastructure.

MDD Cowgirl greets her handler

LEBANON

In 2021, MLI began Peace Through Sport (PTS), a two-year program funded by the U.S. Embassy in Lebanon to pair 400 Lebanese youth with 200 American students for leadership learning through the lens of sport.

Working with in-country partner Anera, MLI designed the PTS program to unite American and Lebanese youth through virtual exchange to promote social cohesion, foster civic engagement, and showcase U.S. values through the lens of sport. Through sport-based activities and guest speakers, the students learn the power of sport as a tool to bring communities together, engender confidence in themselves and others, and grow their leadership skills. At the end of each 8-week session, the students in Lebanon and the U.S. each implement a service project to benefit their communities.

MLI launched the first Peace through Sport session in October 2021, engaging 63 students from Lebanon and the U.S. The U.S. students implemented service projects to clean up their school campus and provide gifts to a local children's hospital.

In Lebanon, the PTS group engaged special needs students in learning development games. The projects extended the reach of the skills learned in the PTS program, impacting 235 community members. Encouraged by the results of the first session, MLI looks forward to the program's impact in 2022.

MDD Nibs and her handler

SRI LANKA

Sri Lanka endured a three-decade-long civil war, forcing hundreds of thousands to flee their homes. Despite the war's ending in 2009, much of the country was left littered with unidentified explosive devices, barring many from returning home to their communities.

MLI began a partnership with the Sri Lankan Army Engineer Regiment's Humanitarian Demining Unit (SLA HDU) in 2003 with an initial donation of 13 MDDs. Support from MLI has helped aid SLA HDU's capacity-building efforts as they work to clear the land and return it to the Sri Lankan people. Since the start of the partnership, MLI has donated 32 lifesaving dogs to the HDU. These MDDs have searched over 1,461,953 m² of land, greatly aiding the land clearance operations.

MDD Bullet with handler

In 2021, SLA HDU's 5 MDD teams worked at six demining sites in the districts of Jaffna and Kilinochchi, located in northern Sri Lanka. In Kilinochchi, the teams worked at the Muhamalai Forward Defense Line site, the frontline of the 2008 civil war between the Sri Lankan Army and the Tamil Tigers. Although the area was heavily mined during the conflict, the SLA HDU has made excellent progress in clearing it with both manual demining and MDD teams. The SLA HDU's utilization of MDDs has allowed manual deminers to focus on more densely contaminated areas, saving an estimated 81 working days for the HDU in 2021 alone!

The districts searched and released in northern Sri Lanka are planned to be turned over for agricultural use. The Sri Lankan Army reports that the MDD teams are working well with their handlers and blending into the overall demining process expertly. With the help of the MDD teams, SLA HDU is maximizing their mine clearance operations. The MDDs remain in good condition and are wonderful assets to the SLA HDU team.

YEMEN

Intensified political unrest and conflict in Yemen have led the country into a humanitarian catastrophe. Since 2015, a civil war, a cholera epidemic, the COVID-19 pandemic, and the presence of landmines have inflicted harm upon civilians, killing over 10,000 people and injuring tens of thousands more. Fields and cities are littered with landmines and explosives, making it impossible for families to return home and for aid organizations to provide humanitarian help.

MLI's partnership with the Yemeni Association for Landmine Survivors (YALS), a local organization that helps survivors reintegrate into society, has enabled us to continue assisting the Survivors' Assistance program, funded by the U.S. Department of State.

Since 2011, MLI's Yemen program has provided 428 landmine survivors with life-enabling prostheses and medical assistance. The program has also supported over 430 survivors who have completed vocational training courses in computer science, carpentry, and sewing.

Landmine survivor, Abdullah, receives his new prosthetic

Landmine survivor, Ghadah, preparing to begin her sewing projects

MLI additionally provides Micro-grants to selected survivors. Interested vocational training course graduates prepare and submit business plans to YALS and MLI for evaluation. Winning submissions receive micro-grants to start their own businesses. In 2021, 10 female survivors received micro-grants, enabling them to start, bolster, and/or continue their sewing businesses.

In July, MLI received a two-year extension grant to continue the Survivors' Assistance Program in Yemen, providing life-enabling support to both adult and child landmine survivors. In 2021 alone, 12 children benefited from the program, receiving prostheses and medical assistance.

DONORS & PARTNERS

HOPE, GROWTH, & STABILITY

Thank you to all of our generous donors, volunteers, supporters, and partners for your 24 years of continuous support. Our work would not be possible without you!

MLI is deeply grateful for the trust and confidence of the U.S. Department of State's Office of Weapons Removal and Abatement, which has been a generous supporter of MLI since 1998.

Support our work!

Visit http://marshall-legacy.org/how_to_help/ to make an online donation.
All donations to MLI are tax-deductible to the fullest extent of the law.

Checks can be mailed to:
